Web Dev Intern Assignment

1. Your assignment is to create a web app(Use Reactjs) to display information about only countries in asia (look for 'Region' section in rest api docs) by consuming a rest api and displaying the data. Show Button to refresh data from rest api.
    - Display following attributes - name, capital, flag(display image for each country), region, subregion, population, borders & languages.
    - Rest API docs - https://restcountries.eu/

Guidelines - Share a github repo link(with run instructions and screenshots) on internshala chat.
